PROFILE	Full-stack developer with 3+ years of experience building complex web applications with C#/.NET, TypeScript and Vue 3. Helped build a production EdTech platform serving 1,000+ users — from the REST API and CMS integration to a full migration from KnockoutJS to Vue 3. Led a team of three, owning task planning, code reviews and CI/CD. Three years of remote work in an international, English-speaking team.		
EXPERIENCE	Full-Stack Developer & Team Lead		07/2022 – 09/2025
	F&L methode B.V. (Taal in Blokjes) · Netherlands, remote - Designed and implemented an extensible REST API architecture in C#/.NET serving multiple client applications — new features without breaking changes. - Migrated a large KnockoutJS codebase to Vue 3 (TypeScript, Composition API) and built modern UI components from design specs. - Lead frontend developer on a new Nuxt 4 / TypeScript project, from project structure to the CI pipeline. - Migrated the frontend build system from Webpack to Vite. - Integrated a CMS into the learning platform, enabling non-technical editors to manage and publish materials for 1,000+ students with dyslexia on their own. - Optimized the CI/CD pipeline (GitHub Actions, TeamCity) by separating type checking from the build — significantly shorter build times and faster feedback. - Owned code quality through regular code reviews and refactoring of legacy modules. - Led a team of three (2 developers, 1 designer), reporting directly to the CEO, including on an accessible Unity learning game.		
	Salesforce Developer		04/2022 – 07/2022
	Customertimes Corp · USA, remote - Developed Apex classes, Lightning Web Components (LWC) and Visualforce pages following Salesforce best practices (Sales Cloud). - Integrated Salesforce with external systems via REST and SOAP APIs for reliable data synchronization. - Automated business processes with Workflows, validation rules and Process Builder.
